SCRATCH PROGRAMMING

Assignment 2

Name: Sasanka Sekhar Kundu
Roll No: 150096725118

Scratch Assignment:
Objective: To understand how games are created using Scratch blocks, sprites, and stages.

Q1. What is a Sprite in Scratch?

a) What is a sprite used for in a Scratch game?
b) Name any two sprites you have used or seen in Scratch.

Answer:

(a) In **Scratch**, a **sprite** is any object or character that can be controlled and animated within a game or project.
(b)the cat and the bell

Q2. What is the Stage in Scratch?

Explain what the Stage is and what it is used for in a game.
(Hint: Where do your sprites move and play?)

Answer: The **Stage** is the main area where your game happens. It is like the background or playground where all your sprites move, play, and perform actions. Everything in my game appears on the Stage.

Q3. What kind of blocks do we use to make a game work?

Match the following Scratch block categories with their purpose:

Scratch Block	What It Does
Motion	c) Moves the sprite around
Events	a) Makes things happen when clicked or pressed

Looks	b) Adds color, looks, or costumes to a sprite

Q4. What happens when you click the green flag in Scratch?

Explain in your own words what happens in a Scratch game when the green flag is clicked.

Answer: When you click the green flag, the game starts. All the scripts connected to the green-flag block begin running, and my sprites start doing whatever actions I programmed for them.

Q5. Create Your Own Mini Game Idea!

Describe or draw your own Scratch game idea. Include:
- Game Name: A Zombie Shooter Game
- Main Sprite: Kitty Cat
- Goal of the Game: The goal of the game is to shoot all the zombies that come toward the Kitty Cat.
- Blocks you will use:
- What happens when the game ends: Shows Game Over

Answer: Drive Link
